Boeing Is in Space Age to Stay; Has Two Billion Backlog

Firm Pioneer in Jet Field

By ROBERT L. TRUSU

The Boeing Co. is beginning to produce a product of strategic importance to the United States. The airplane, recently put into the production line, is the first in the world to be developed for the new space age.

The new plane is a long-range, high-altitude, jet-powered, all-weather aircraft designed specifically for the needs of the United States Air Force. It is the first in a series of similar planes to be built for the Air Force, which is increasing its pace of development.
