NOTES: The Puget Sound Consumers' Checkbook comparison covered 429 auto-repair shops. This chart shows shops with at least 40 ratings from consumers that received a "Superior" overall rating from at least 80 percent of those consumers.

PRICE INDEX: This is intended to suggest the price a customer might expect to pay for repairs that would cost \$100 at the "average" shop repairing the same type of car. The index is based on prices quoted to Checkbook telephone shoppers for some or all of three specific repair tasks. For each shop, a make or several makes of cars were selected from among the makes the shop regularly services. All prices quoted were for a make of car the shop repairs and the shop was compared to other shops with price quotes on the same make and repair.
